

Visual Arts Specialization Advanced Honors

Photography 2

Pre-requisite Photography 1

In this class students will be exposed to more technical photography assignments that revolve around digital media. Students will be placed into other classes that I teach. This means students must be highly motivated and good at independent work. Students will further learn about their digital SLR cameras. Each student must have their own digital SLR camera. Students that are accepted into this program must have taken Art one and Photography One. I will decide if the student is capable of this type of class.

Students must be able to purchase their own inkjet photographic paper. Students will be doing more digital editing in class and will be printing their own photos from the printer in my classroom. It is preferred that the student can drive themselves to different places to take photos relating to the assignments given.
